The Team: Building the Future of Investing

Nazym Azimbayev

Co-founder, CEO

> fmr. **CIO** of a sovereign wealth fund (SWF)
> 2x founder, **1 exit** (**Estimatix**, Youmely)
> Architect of **Sovereign CBDC** (Digital Tenge)
> BS/MS Math, Moscow State University

Andrey Kim, PhD

Co-founder, CTO

> **IMO Gold**, top Researcher, Samsung SAIT
> Quant, Deutsche Bank
> Co-Author of **CKKS encryption standard**
> **10+ US patents**, 3,700+ citations
> PhD, Seoul National University

Andrew Ang, PhD

Chief Strategist

> fmr. Head of Systematic Investing, **BlackRock**
> Professor, Columbia Business School
> **Architect** of modern factor investing
> **34,000+ citations**
> PhD, Stanford

Together, we published "The Path to Autonomous Investing" – the vision, and "The Self-Driving Portfolio" - the architecture. Now we're building it.

BlackRock. Deutsche Bank Stanford University NIC NBK SAMSUNG SAMSUNG ADVANCED INSTITUTE OF TECHNOLOGY 서울대학교 SEOUL NATIONAL UNIVERSITY MSU

Why now: Reasoning is the New Edge

Information Edge

Knowing the news first

Quantitative Edge

Faster math & stat arb

Reasoning Edge

Agents that analyze, decide, and adapt

1980s

2000s

Today

From Human-Centric to AI-Native Investing

Incremental isn't enough. Redesign from first principles.

1

Asset Classes Transformation

Beyond asset classes:
Multi-dimensional categorization

2

Continuous Asset Allocation

24/7 monitoring:
Markets never sleep

3

Risk Management

Risk beyond numbers:
It's text, voice, video — everything.

4

Roles Transformation

PM → Oversight:
Supervision not execution

The future of investing is **fully autonomous**

Our Path to Fully Autonomous Investing

Autonomous driving as a reference

Level 3

Assisted

- Human-led
- AI-supported

Q1 2025

Level 4

Agentic

- AI proposes
- Human supervises

Today

Level 5

Autonomous

- AI reasons and adapts

Q4 2026

Read the full approach in our paper
"AI for Investing: Lessons from Autonomous Driving"

Our Traction: We started with Value Investing

Where reasoning matters more than data advantage

+33%

gross return in 2025

Sharpe Ratio	Max Drawdown
2.28	**5%**
S&P 500: 19%	Citadel: 10%

Methodology

Strategy:	US/China equities, value approach
Period:	Jan – Dec 2025
Capital:	*490K->650K*
Human role:	PM approval through Q3 2025; monitoring after
Leverage:	*No*
Account:	Live capital, audited brokerage account

Apex: The Agent Behind Our Performance

A self-improving research agent — built on a coding stack

> Apex captures how PMs think — encodes into skills

> Skills are self-improving

> Research as code (VS Code, GitHub, Claude Code, Open Code, etc.)

BARREL

Apex's Skill Evolver

> **Reviews** every trade's reasoning vs. outcome

> Writes **new skills as code**, not rules

> Deploys upgrades to all agents automatically

Adding Agentic Asset Allocation

When Value Scales, Allocation Changes Completely

Agentic Asset Allocation

- 20+ **competing methods**, agents vote
- **BARREL** learns from realized returns

+

- **Deep fundamental** research on each security
- Agents **source, analyze, and score**

Scaled **Value Approach**

=

Fully Autonomous Investing

The Mission: Top-Decile Returns at Index-Fund Fees

Alpha stays with the LP

Traditional Approach

> Top human talent requires massive incentives

> 20%+ Carry + Pass-Throughs

> High structural cost to deliver alpha

Altbridge – FAI Approach

- Agents only require compute
- Transparent Fixed Fee (50-150 bps)
- Alpha generation flows directly to the LP

Wedge: Agentic Indices

Why this wedge works

- Replaces static indices
- Fits existing workflows
- Mandate-constrained → easier
- Fixed fees — 50–150 bps vs. 2/20

Initial buyers

Banks — index-linked mandates, structured products

Sovereign Wealth Funds — large-scale allocation with AI governance

Revenue model

Near-term:

Mandate fees + index methodology licensing

Expansion:

50–150 bps AUM as ETFs + mandates scale

Indices first · expand over time

Early Signal: Institutional Pipeline + Public Research

> **Reviewing AI Value Index:** UBS QIS

> **Agentic SAA implementations SWF Pipeline:** ADIC, EIA, NBK, Institute of Sovereign Investors

Why It Compounds

The moat deepens over time

Knowledge

Context graph captures how exceptional PMs analyze, reason, and decide. This isn't data — it's **judgment**. Can't be scraped.

Validation

Skills aren't theoretical — they're **proven with our own money**. You can't shortcut this. It takes capital and time.

Compounding

More trades → better skills → better returns → more capital → more trades. The flywheel **can't be bought, only built**.

ALPHA ARENA 2026

The **best LLMs** lose money when they trade. The model is commodity. **The process — and the data it generates —** is the moat.

Roadmap: Intelligence Layer for Autonomous Investing

Replacing static indices with agentic infrastructure

Phase 1
Custom Agentic Indices

> Custom Agentic Indices/Model Portfolio for Banks & Sovereign Wealth Funds

> Profit-sharing and licensing fees per mandate

Phase 2
Autonomous ETFs

> Launching a suite of autonomous public ETFs (e.g., the flagship "Altbridge 50")

> 50–150 bps on AUM

The Ask

Proof -> Adoption

$3M SAFE

Use of Funds:

> Engineering and **Investment team** (40%)

> Compute infrastructure to **scale** more strategies (40%)

> **Institutional** Pilots (3–5 mandate rollouts) (20%)

Round Milestones

✓ Sign first institutional design partners

✓ Prove repeatable deployment in initial domain

✓ Position for Series A
